## BENEFITS SOLUTIONS FOR THE VET

Uniquely formulated, EmerAid provides species-specific nutrition that is easy-to-prepare for a range of feeding styles.

### FASTER ENERGY

- Semi-hydrolyzed formula provides faster nutrition absorption
- Highly digestible blend of fats, proteins, and simple carbohydrates

### BETTER HEALING

- Contains essential amino acids for protein synthesis and tissue repair
- Higher protein percentage to rebuild muscle mass

### STOP DIARRHEA

- Balanced blend of fibers and prebiotics improves GI tract function
- Semi-hydrolyzed nutrition minimizes risk of allergic reactions

### HIGHLY PALATABLE

- Appealing texture and smell so that animals readily lap it up
- Flexible ways to feed provide options to entice animals to eat

### EASIER TO FEED

- High kcal/ml allows for smaller volumes and shorter feeding times
- Flows smoothly down nasogastric or enteric tubes as small as 5 fr

### 2 FORMULAS FOR DOGS

# NUTRITION

## MAKE EVERY BITE COUNT

EmerAid was formulated by a team of veterinarians and nutritionists to support animals with a range of acute to chronic conditions. AAFCO approved, it can be fed as a complete diet OR as a meal supplement.

EmerAid is the most tasty and energy dense nutrition on the market, because when pets are ill, *every bite counts*.

### PRODUCT HIGHLIGHTS

**Hydrolyzed soy protein** minimizes gastrointestinal hypersensitivity

**Feline formula** has high protein and low carbohydrate to support their unique nutritional needs

**Medium chain triglycerides**, a source of easily digested fat, provides readily available energy.

**Highly Digestible:** Better absorption for faster nutrition

**L-tryptophan** a precursor to serotonin reduces stress

**Macronutrients** are highly digestible to prevent and manage osmotic diarrhea

**Prebiotics** nourish and promote healthy GI tract bacteria

**No artificial colors or preservatives** present

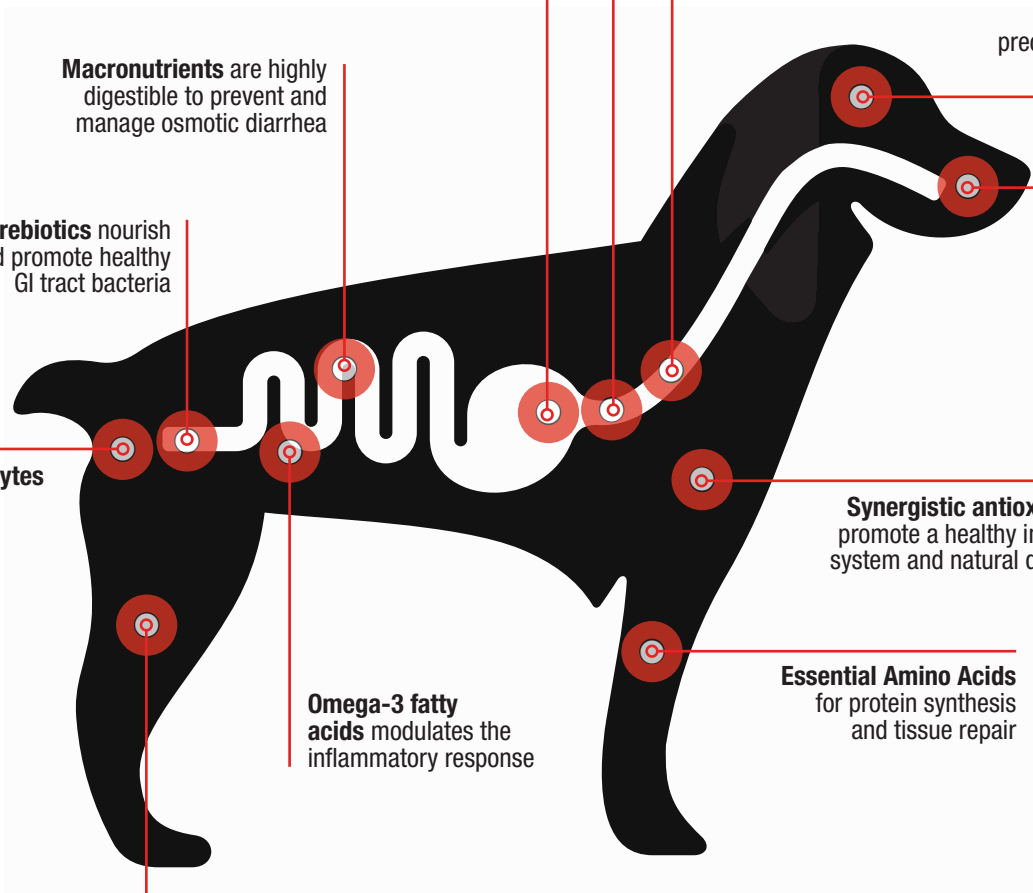

**Balanced electrolytes** compensate for electrolyte loss during vomiting and diarrhoea

**Synergistic antioxidants** promote a healthy immune system and natural defense

**Omega-3 fatty acids** modulates the inflammatory response

**Essential Amino Acids** for protein synthesis and tissue repair

**BCAAs** promotes muscle synthesis and increases lean body mass

# INDICATIONS

## INTENSIVE CARE & SUSTAIN

Both Intensive Care and Sustain provide support for a variety of conditions where inappetance is a complicating factor. The degree of condition severity and need for rapid nutrition absorption will often be the deciding factor in choosing Intensive Care or Sustain formula.

### When to Choose Which Formula?

EmerAid is species specific with the right proportion of macronutrients and additional micronutrients for cats and dogs.

Choose **INTENSIVE CARE** for patients that are critical and with acute presentations. When time is important, turn to this formula. It contains the most hydrolyzed nutrition and is designed for maximum rate of nutrient absorption.

Choose **SUSTAIN** formula for stable patients, with acute to chronic presentations. Designed for optimal nutrition absorption, it contains more whole ingredients. Sustain can be sold over the counter, extending veterinary care into the home.

### EmerAid INDICATIONS

- Critical Illness
- Inappetance
- Malabsorption/maldigestion
- Megaoesophagus
- Geriatric
- Cachexia
- Acute kidney disease
- Pancreatitis
- Infectious disease
- Anemia
- Failure to thrive or gain weight
- Neglect
- Hepatic lipidosis
- IBD
- EPI
- Palliative care
- Parvovirus

### CONTRAINDICATIONS

- Chronic kidney disease if fed longer than 60 days
- Hepatic encephalopathy

# EmerAid<sup>®</sup> in Australia

Life Saving Nutrition™  
A DIVISION OF LAFEBER

# SUSTAIN

## INDICATIONS

EmerAid **SUSTAIN** supports patients with acute to chronic conditions that are not in a critical state. It can be used in hospital with the option to extend veterinary care into the patient's home. EmerAid Sustain is available over the counter and meets AAFCO nutritional requirements, so it can be given as a sole diet or as a supplement.

### INDICATIONS: Short Term

- Supports patients with gastrointestinal disorders
- Firms up stools while maintaining a caloric value
- Improves feed intake with high palatability
- Transitions critical care patients back to their normal diet
- Helps extend simple and easy tube feeding at home
- Supplies complete nutritional needs in smaller volumes

### INDICATIONS: Long Term

EmerAid Sustain provides pets with a nutritional boost to enjoy and extend a good quality of life. It offers support to pets with:

- Chronic conditions such as megaesophagus or IBD
- Geriatric issues such as inappetence and mental decline
- Need for rebuilding muscle mass and increasing mobility
- Cancer requiring palliative care

# EmerAid® in Australia

Life Saving Nutrition™  
A DIVISION OF LAFEBER

# INTENSIVE INDICATIONS

EmerAid **INTENSIVE CARE** is designed for critical care patients to quickly digest and absorb nutrition despite an often compromised GI tract. Optimal nutrition absorption is achieved via a unique formula of semi-hydrolyzed macronutrients consisting of branched chained amino acids, medium chained triglycerides, and simple carbohydrates.

## CRITICAL NEED

EmerAid IC prevents a negative-energy balance in hospitalized patients. The powder formula allows the veterinary team to select from six different feeding strategies to encourage feed intake, improving healing time and decreasing hospital stay. Its high palatability provides the option for sick animals to voluntarily lap up EmerAid formula but if tube placement is required, EmerAid will easily flow down a 5fr nasogastric tube whilst maintaining a high calorie density.

## RECOMMENDED USES

- Critical illnesses
- Anemia
- Infectious disease
- Hepatic lipidosis
- Pancreatitis
- Acute kidney disease
- Peritonitis
- Compromised GI tract such as IBD and GI lymphoma
- Parvovirus
- Patients needing smaller volumes
- Puppies and kittens that fail to thrive or have diarrhoea

SKU# ICP = Intensive Care Piscivore

SKU# ICO = Intensive Care Omnivore

#### **PRODUCT SHIPMENT**

Shipped by VNS in Australia, turnaround is generally 3-10 working days from order to arrival. A sealed package will last for up to 1.5 years on the shelf. Once opened it will last 1 month in the fridge.

#### **HOW TO ORDER**

- Order both IC and Sustain through the VNS website.
- Intensive Care products are sold only to industry professionals such as veterinarians, hospitals or wildlife organizations. Create an account to order IC products.

1. Visit [www.vetnutritionsolutions.com.au](http://www.vetnutritionsolutions.com.au)
2. Create account by clicking Login in the upper righthand corner
3. Fill out the form including the vet section  
(Store Name, Address and ABN)
4. A confirmation email granting access to the Veterinarian Store will be sent
5. Click Shop/Veterinarian Store for prices and to place your order
6. Two payment options: Credit card (preferred) or invoice  
(payments due within 30 days via direct transfer)

#### **PRODUCT SUPPORT**

EmerAid is imported by VNS, led by Dr Jade Kingsley, a practicing veterinarian with experience in treating dogs, cats and exotics. She has worked in emergency, GP, and exotics practices and has a solid background in animal nutrition.
